ANNEX M

List of Intelligence Projects and Problems
Considered by the Intelligence Advisory Committee,
October 1950-February 1953

List of Intelligence Projects and Problems
Considered by the Intelligence Advisory Committee,
October 1950-February 1953

During the 29 months of General W. Bedell Smith's Directorship of CIA, the Intelligence Advisory Committee met almost a hundred times, usually under his chairmanship, to review a variety of intelligence production projects and to consider numerous other projects and problems of common interest to CIA and the departmental intelligence agencies that were represented on the IAC. Listed below in summary form are all the items that were formally placed on the agenda and acted on by the IAC during that period, except for National Intelligence Estimates, which are separately tabulated in another Annex. For each of the items taken up there are normally two types of historical record, usually classified Secret or Top Secret: (1) a formal paper or terms of reference, prepared in advance for the IAC members by CIA/OIC (where the IAC secretariat was located), and labelled and numbered in the style IAC-D-; and (2) the IAC minutes, which contain a summary of the discussions and conclusions, and which were numbered and recorded in the style IAC-M. Sets of the numbered IAC-D documents and of the IAC-M minutes are on file in the IAC secretariat (now located in CIA/ONE) and in the Executive Registry, O/DCI. The summary below is arranged topically, thereunder chronologically.

Intelligence Production Projects

In addition to the items below, numerous estimates projects (for NIE's or SE's) were also, of course, reviewed at various stages of production by the IAC. These estimates projects, which were normally not scheduled by means of "IAC-D" documents, are omitted from this list and, instead, are tabulated separately in Annex K.
